ASSURED QUALITY
PRODUCTS AND SERVICES

QUALITY AND STANDARDS

Turbofluid Engineering's Westmead Workshop is ISO9001 compliant and SABS approved (which surpass ISO and NOSA standards) for quality and safety respectively.

PERSONNEL

Professional workforce, qualified and experienced in their specific fields. Our dedicated team supplies a comprehensive service to our customers which include meticulous precision, good work ethics and valuable information and solutions for all pumps, valves and fabrication applications.

Our personnel focus on technical issues or enhancements identified by the customer, such as equipment efficiency, reliability, ease of operation, maintenance, safety, performance and output. Our support network offers a comprehensive range of professional services with the overall aim of maximizing the return on your investment by using our products.

SERVICE AND SUPPORT

We believe that the ability to successfully offer our customers complete business support and ongoing service, depends on the successful implementation of innovative technology which requires both experience and commitment.

Our product managers and technical professionals draw upon combined experience gained, to offer superior product support mechanisms through training and education services that ensure optimum plant operation and minimal downtime.

Our factory houses the largest pump performance test bay facility (200kW, 120,000 liter) in Kwa-Zulu Natal, able to test in accordance with ISO9906 standards. The facility also includes services, equipment and machinery described below.

Fabrication & full welding facility, Milling & slotting, Drill press, Boiler making services, Plasma Cutting, Laser alignment, Spray booth, Sandblasting, Bending Machine, Horizontal and Vertical Bore-mills and various lathes.
